

Application Note

Adding Kattack Replays to your Web Site

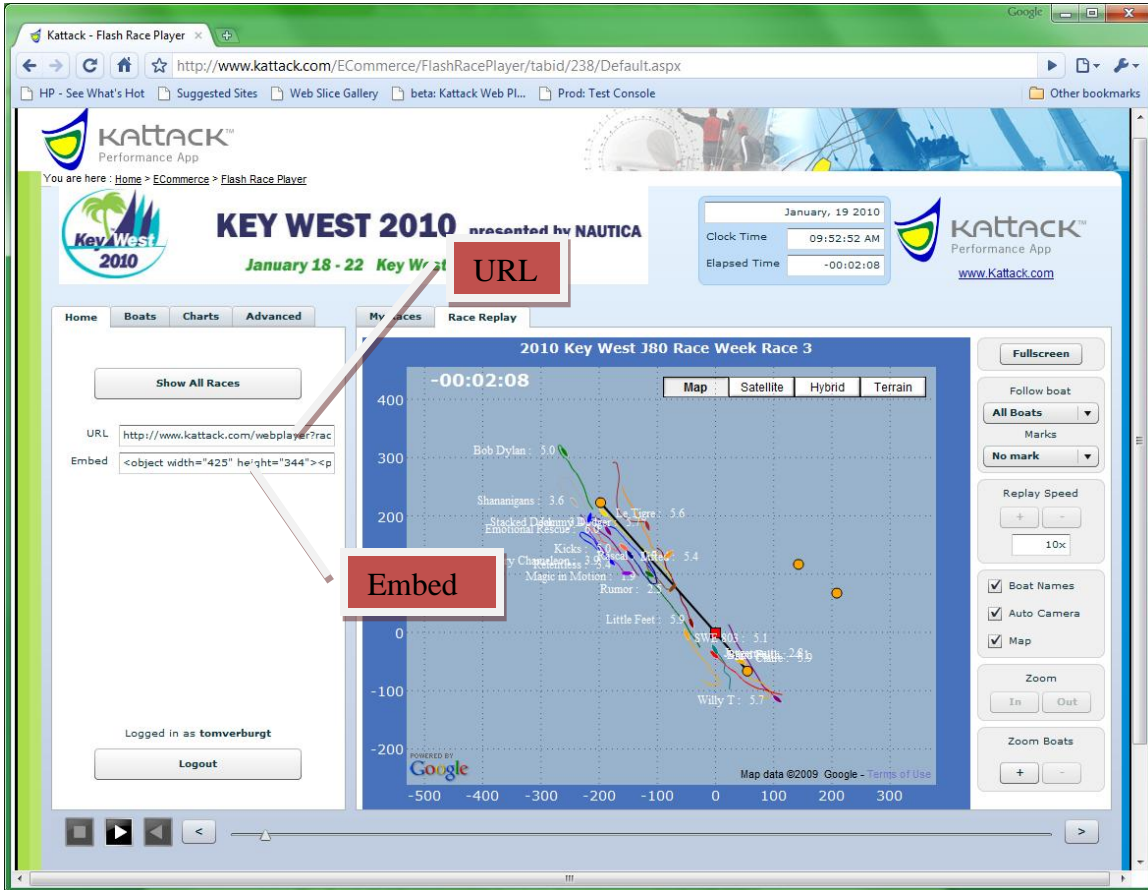

February 3, 2009

The Kattack Race Player allows you integrate Kattack races into your web site by linking directly to specific races or by embedding a player window directly into you web site.

The Web Player (www.kattack.com/webplayer) window provides URL and EMBED strings for the race or live feed that is currently being played.

URL Links

<http://www.kattack.com/webplayer?raceGUID=1a21cace-3d41-4d47-bb4e-19267ee6963f&startTime=172>

URL links will open a new browser window and start playing the race.

Bookmark Points of Interest

The URL for published races contain a "startTime" parameter that specifies the time offset from the beginning of the race at which to start playing the race.

```
http://www.kattack.com/webplayer?raceGUID=1a21cace-3d41-4d47-bb4e-19267ee6963f&startTime=172
```

This race will start playing 172 seconds after the beginning of the replay. The offset is from the beginning of replay. The beginning of the replay is usually not the start of the race. The beginning of the replay is typically five minutes prior to the actual start of the race.

The startTime value changes as the race is playing so whatever the time is during the race replay when the URL string is copied will be the time the race starts playing when the resulting URL is clicked. This feature can be used to bookmark or link to specific points of interest during a race. For example, starts, mark roundings, crossings, collisions, etc.

Embed Links

The Embed link can be copied and pasted into the body of an HTML page. When the page is displayed, the embed text will create an embedded window. This works similar to how YouTube videos are embedded.

```
<object width="425" height="344"><param name="movie" value="http://www.kattack.com/webplayer/KattackEmbeddedPlayer.swf?raceGUID=1a21cace-3d41-4d47-bb4e-19267ee6963f&startTime=172"></param><param name="allowscriptaccess" value="always"></param><embed src="http://www.kattack.com/webplayer/KattackEmbeddedPlayer.swf?raceGUID=1a21cace-3d41-4d47-bb4e-19267ee6963f&startTime=172" type="application/x-shockwave-flash" allowscriptaccess="always" width="425" height="344"></embed></object>
```

The Embed links contain a start time parameter, similar to the URL links, that will start the race replay at the same time the race was playing when the embed string was copied. See Bookmarking above for more details.

Changing the Size of the Embedded Window

The Embed string contains window size parameters, **Width** and **Height**. There are two copies of the width and height parameters in the embed string and you must change both pairs in order for the embed string to work properly in all browsers.

```
<object width="425" height="344"><param name="movie"
value="http://www.kattack.com/webplayer/KattackEmbeddedPlay
er.swf?raceGUID=1a21cace-3d41-4d47-bb4e-
19267ee6963f&startTime=172"></param><param
name="allowscriptaccess" value="always"></param><embed
src="http://www.kattack.com/webplayer/KattackEmbeddedPlayer
.swf?raceGUID=1a21cace-3d41-4d47-bb4e-
19267ee6963f&startTime=172" type="application/x-shockwave-
flash" allowscriptaccess="always" width="425"
height="344"></embed></object>
```

LIVE vs. Published Races

Linking and embedding LIVE races is different from linking to published races in that LIVE links do not have a start time. LIVE links always attempt to start playing at the current time. If there is no LIVE data available or the feed is over, the player will ask if you want to start playing from the beginning of the feed.

Only leave LIVE links on your web site during the event

Since LIVE links will always try to play LIVE data, and there not be any LIVE data after the racing is over, or since the LIVE link may start playing days before the actual event, it is always a good idea to put a link to <http://Kattack.com/webplayer> near the embedded player so user can easily start the standard player when there is no LIVE action.

\$	Series	Race	Photo	Date
	Race Week	8	0	21 January 2010
	Race Week	7	0	21 January 2010
	Race Week	6	0	20 January 2010
	Race Week	5	0	20 January 2010
	Race Week	4	0	19
	Race Week	3	0	19
	Race Week	2	0	18 January 2010
	Race Week	1		18 January 2010
	Race Week	0 (live)	0	16 January 2010
	Race Week	10	5	23 January 2009
	Race Week	9	88	23 January 2009
	Race Week	8	0	22 January 2009
	Race Week	7	0	22 January 2009

A red box labeled "LIVE Feed" is positioned over the row for Race Week 3, with a red arrow pointing to it from the right.

Kattack Artwork

Artwork can be found on the Kattack web site under company information.
